Conviron*Direct*

Upgrade to **Conviron*Direct*** and take your research to the next level. Conviron*Direct* is a premium software tool that enables you to manage chamber setpoints and actual conditions remotely through any building LAN connected desktop, notebook or handheld mobile device.

With a highly intuitive dashboard layout and enhanced graphing tools, see why Conviron*Direct* is the industry's leading software platform providing seamless connectivity to *your* chamber, *your* plants, and *your* data from virtually anywhere.

*With Conviron**Direct** I always have access to my chamber.*

Be in control. From anywhere.

- Access your Conviron plant growth chambers at your desktop, laptop, tablet or on the go
- Save time by not having to be near your chambers
- Customize your desktop to access all of your chambers at-a-glance
- Name your chambers according to your preferences – e.g. Arabidopsis chamber, LED Walk-in, CO_2 chamber, etc.
- Gain access to enhanced graphing capabilities and user experience
- Never lose touch with your plants and your research data – wherever you are

Conviron*Direct* is fully compatible with Conviron chambers or rooms equipped with the CMP6060 control system (pictured at right) and can be activated remotely by contacting Conviron.
