# Conviron*Direct* *Quick Start*
1 **Connect chamber to building network**

In order to interact with a chamber using Conviron*Direct*, the chamber must be connected to the building network. The chamber can connect to a building network seamlessly using CAT5e or CAT6e Ethernet cable.

2 **Assign network address to the chamber**

The chamber must be on the same network as the workstation used to access Conviron*Direct*. Using the chamber display, assign a suitable network address to the chamber. The network address used for Conviron*Direct* will be the Main Controller address. To access the chamber network settings, navigate to **Settings → Network**.

3 **Connect to the chamber using a web browser**

Conviron*Direct* can be accessed using a web browser. While all browsers are compatible, Conviron recommends using Chrome. In the address field of the web browser type in the IP address of the Main Controller.

4 **Contact Conviron for an activation license**

Conviron*Direct* requires an activation license before it can be used. A license can be obtained by calling Conviron, scanning the QR code, or sending an email to convironservice@conviron.com

5 **Enjoy using Conviron*Direct***

Conviron*Direct* is now activated and can be enjoyed from the comfort of a desktop, tablet, or any other device connected to the same network.
